RULEBUILDER

Business Background & Risks

Morrisons Solicitors is a leading law firm in the south east of England. Founded nearly 300 years ago, Morrisons provides an integrated commercial service to clients ranging from blue-chip corporates to SMEs, OMBs and family-run businesses. The firm also offers a full range of services to private individuals, including family, residential conveyancing, wills, estates and tax planning, probate, personal injury and clinical negligence.

Due to the nature of its work, Morrisons deals with highly sensitive information on a daily basis. The firm realised that there was a real risk that this sensitive information could be accidentally sent the wrong person. After evaluating the potential consequences of such a breach, they sought CheckRecipient's solution to intelligently prevent misaddressed emails.

“With the new GDPR landscape, CheckRecipient is a crucial component of our data breach prevention strategy. It proved its worth to us within a month of installation.” Debbie Dolan, Operations Director

Solution & Benefits

CheckRecipient initially deployed the software to a subset of users to test the product. Once connectivity testing with the sample users was successfully completed, the add-in was rolled out firm-wide to over 150 users. After an initial period, CheckRecipient presented a detailed report containing email statistics around misaddressed emails via Guardian.

The results from this report indicated that the Guardian was able to detect and prevent misaddressed emails. It also gave Morrisons an insight into some significant email statistics which equipped them with the data needed to design key rules and policies on outgoing emails using RuleBuilder.

CheckRecipient now protects Morrisons from multiple risks around confidential and sensitive data leakage every day.

About CheckRecipient

CheckRecipient is a next-generation email security technology to prevent highly sensitive information being sent to the wrong people. CheckRecipient uses machine learning to analyse historical email data and automatically identify anomalies and mistakes on outgoing emails which may result in inadvertent data loss. Some of the world's largest organisations rely on CheckRecipient's technology across the financial, legal, professional services and biotech sectors. The company is headquartered in London, UK.
